 Confidential - For Authorized Investors Only

Prepared for Hivemind Capital Partners

We're excited to present Arc Treasury — a project that aligns with your thesis-driven approach to **Payment Rails** and **Infrastructure** investments. Built on Circle's institutional-grade L1, we're bridging TradFi yield to the protocol economy.

Arc Treasury

The first yield vault natively built on Circle's Arc L1

USDC yield from T-Bills. Built on Circle's L1. Live on testnet.

The Problem

\$270B in stablecoins earning 0% yield

Billions idle. Users want safety + returns — but have no bridge between DeFi & T-Bills.

DeFi risks

Variable rates + high risks

TradFi

Slow, limited access, no crypto rails

USDC Hold

Zero yield on idle capital

Arc Treasury bridges this gap.

The Solution

Arc Treasury: T-Bill yield in one click

Treasury Vault

Deposit USDC → earn ~4% APY from T-Bills via USYC

Multi-chain Bridge

Sepolia ↔ Arc ↔ Solana via Circle CCTP V2

Stablecoin Swap

USDC/EURC AMM pool with real EUR/USD rate

Points & Rewards

Gamified incentives, NFT badges, multipliers

What is USYC? [Learn more →](#)

USYC is Hashnote's tokenized US Treasury fund — backed by short-term T-Bills yielding ~4% APY with instant USDC redemption available 24/7.

Democratizing Access: Direct USYC requires institutional status, KYC, and \$100K minimum. Arc Treasury removes all barriers — any USDC holder can access T-Bill yields.

Live on testnet: arctreasury.biz →

Why Arc?

Circle's own Layer 1 blockchain

Native USDC

Not bridged tokens

Direct Relationship

With \$80B stablecoin issuer

First Mover

Low competition advantage

Institutional-grade

Enterprise infrastructure

Building on Circle's strategic L1 = strong ecosystem backing

Fully Functional Product

Production-ready on testnet

Arc Treasury is not a concept — it's a fully operational DeFi yield vault with 5 production contracts.

Treasury Vault (upgradeable proxy)

Locked positions: 1, 3, 12-month terms

CCTP V2 Bridge: Sepolia ↔ Arc ↔ Solana

AMM Swap: USDC/EURC with real EUR/USD rate

Points engine + NFT badges (1.2x-3x multipliers)

Referral system: 5 tiers (Bronze → Diamond)

Pre-Mainnet (funded by seed)

- Security audit (Trail of Bits / OZ)
- USYC institutional onboarding (KYC, \$100K+)
- Bridge: Base, Arbitrum, Polygon
- DEX aggregator & liquidity routing
- Portfolio dashboard & tx history
- Achievements & gamification
- Points optimization & anti-gaming
- Admin dashboard & monitoring

Post-Mainnet Roadmap

- Auto-compound vault
- SDK/API for dApp integrations
- Mobile app (PWA)
- Additional yield integrations
- Governance (post-TGE)
- Institutional solutions

Core complete. 50+ testnet deployments. Development + Audit → Mainnet.

Business Model

Path to \$2.6M ARR at \$100M TVL

Revenue Stream	Fee	At \$100M TVL
Vault yield fee	5% of yield	\$200K/year
Bridge fees	0.06%	\$1.4M/year
Swap fees	0.2%	\$1M/year
Total		\$2.6M/year

Scale Economics

\$10M TVL
\$260K
Break-even

\$100M TVL
\$2.6M
Conservative

\$500M TVL
\$13M
Growth

\$1B TVL
\$26M
Onco-scale

Unit economics improve with scale — fixed infra costs, variable revenue. 80%+ margin at scale.

Traction

Real testnet metrics — First Month (organic)

1,269
Transactions

\$31M+
Volume

162
Active Wallets

290K+
Points Earned

24+
Referrals

All metrics achieved with \$0 marketing spend — organic users from Arc ecosystem.

"The project is too early for direct investment from our side but we'll keep a very close eye out as you continue to scale."

— David Shamash, Circle Ventures (Dec 2025)

"The vault looks great!"

— Elton Tay, Circle DevRel Lead (@TxnSheng)

"This is dope man, kudos"

— Techydom, Adom Labs CEO (@TechyDom)

Investment Ask

Seed Round — Flexible Tiers

\$400K

\$800K

\$1.2M

\$400 000

Minimum viable raise — lean execution

Token allocation	6.7%	Vesting	6mo cliff, 18mo linear
FDV	\$6M	Previous capital	\$0 (bootstrapped)
Instrument	SAFT	Seed cap	\$1.2M (20%)

Use of Funds — \$400K allocation

Security Audit \$50K Basic tier: Core contracts review, common vulnerabilities Independent auditors Softstack Zelynx 12.5%	USYC Integration \$100K Hashnote/Circle institutional onboarding: KYC, legal docs, API integration, compliance setup. 25.0%
Founders (2) \$138K 2 founders (net): Dev \$5K + Ops \$4K + 12mo. Gross \$138K incl. payroll taxes. 34.5%	Legal & Entity (Basic) \$42K Georgian LLC + virtual office + outsourced accountant + basic SAFT. 10.5%
Marketing (DIY) \$50K In-house: micro-KOLs, paid posts, Telegram ads, community campaigns. 12.5%	Operations (Basic) \$20K Infra (RPC, hosting) + 2 laptops. 5.0%

* Allocations are indicative estimates. Final breakdown negotiable with lead investor.

What \$400K unlocks:

Mainnet launch Core product live 12-month runway

Limitations at this tier:

No AMM liquidity Vault + Bridge only

Future Funding Rounds

Seed (Current)
\$400K @ \$6M FDV
6.7% tokens

Strategic (Post-Mainnet)
\$2-3M @ \$15-25M FDV
Ecosystem partners

Public / TGE
\$40-60M FDV
Post-mainnet

Seed investors: 3-10x upside to Strategic, 7-10x to TGE.

Investment Ask

Seed Round — Flexible Tiers

\$400K

\$800K

\$1.2M

\$800 000

Comfortable raise — balanced growth

Token allocation	13.3%	Vesting	6mo cliff, 18mo linear

Instrument	SAFT	Seed cap	\$1.2M (20%)

Use of Funds — \$800K allocation

Security Audit

\$100K

Standard tier, full codebase audit, formal verification

Hacken Certik Quantstamp

12.5%

USYC Integration

\$100K

Hashnote/Circle institutional onboarding: KYC, legal docs, API integration, compliance setup.

12.5%

Team (4)

\$260K

Founders \$158K + Jr Dev/QA + SMM (net \$4K each) + 12mo. Gross \$260K incl. payroll taxes.

32.5%

Legal & Entity (Standard)

\$50K

Georgian LLC + co-working space + accountant + SAFT + token legal review.

6.3%

Marketing (Agency)

\$120K

Mid-tier agency + KOL partnerships + CoinGecko/DMC listings.

15.0%

Initial Liquidity

\$50K

Protocol-owned liquidity for USDC/EURC AMM pool. Enables swaps at launch.

6.3%

Operations (Standard)

\$60K

Infra + equipment + 1 conf (Dubai: tickets + travel).

7.5%

Contingency

\$60K

Buffer for unexpected costs, market changes, or extended runway.

7.5%

* Allocations are indicative estimates. Final breakdown negotiable with lead investor.

What \$800K unlocks:

Marketing agency AMM pool live 15-month runway

Limitations at this tier:

Limited liquidity depth

Investment Ask

Seed Round — Flexible Tiers

\$400K

\$800K

\$1.2M

\$1 200 000

Target raise — full expansion

Seed cap

\$1.2M (20%)

Lead Investor Bonus

Full round commitment (\$1.2M) unlocks **3-month cliff** instead of standard 6-month — earlier liquidity for strategic partners.

Use of Funds — \$1.2M allocation

Security Audit

\$150K

Premium tier: Multi-round audit, economic review, ongoing support

Trail of Bits

OpenZeppelin

Consensys Diligence

12.5%

USYC Integration

\$100K

Hashnote/Circle institutional onboarding: KYC, legal docs, API integration, compliance setup.

8.3%

Team (6)

\$383K

Founders \$138K + 4 hires (net \$2-3K each) * 12mo. Gross \$383K incl. payroll taxes.

31.8%

Legal & Entity (Full)

\$80K

Georgian LLC + dedicated office + full-time accountant + SAFT + token legal opinion.

6.7%

Marketing (Premium)

\$167K

Top agency (Lunar/Serotonin) + tier-1 KOLs + full PR + conferences.

13.9%

Initial Liquidity

\$120K

Protocol-owned liquidity for USDC/EURC AMM pool. Enables swaps at launch.

10.0%

Operations (Full)

\$100K

Infra + equipment + 2 conf [Dubai & Singapore: booth + team + travel].

8.3%

Contingency

\$100K

Buffer for unexpected costs, market changes, or extended runway.

8.3%

* Allocations are indicative estimates. Final breakdown negotiable with lead investor.

What \$1.2M unlocks:

Full product suite

Deep liquidity

18-month runway

Conference presence

Roadmap

2026-2027

Q1 2026 Seed close, Georgian LLC

Q2 2026 Security audit, USYC Institutional

Q3 2026 Mainnet launch on Arc

Q4 2026 \$5-15M TVL, growth push

2027 Multi-chain expansion via CCTP

2027+ Token launch (TGE)

** Timeline dependent on Arc L1 mainnet launch by Circle. Dates may shift accordingly.*

Hivemind Portfolio Fit

How Arc Treasury aligns with your thesis

Payment Rails

Like your investment in RD Technologies — we're building critical USDC infrastructure via Circle's CCTP V2, enabling seamless cross-chain stablecoin settlement.

Real World Assets

Aligned with your 2024 focus on RWA — Arc Treasury brings US T-Bill yields on-chain via USYC, the largest tokenized Treasury fund.

Crypto Infrastructure

Alongside GFO-X and Hiro in your portfolio — we're building foundational DeFi infrastructure on Circle's institutional-grade L1.

Institutional Grade

Your thesis on "institutionalizing digital assets" matches our approach — Circle-backed yield, compliant structure, enterprise infrastructure.

Why Invest Now?

- 1 **Working product** — Not a whitepaper
- 2 **First mover on Arc** — Circle's strategic L1
- 3 **Real yield** — US T-Bills, not ponzinomics
- 4 **Conservative valuation** — 20-40x upside potential
- 5 **Lean execution** — Startup speed, institutional-grade architecture

We're raising a lean seed to own the Arc-native DeFi layer before TGE.

Your entry point to a new L1 — with real USDC yield baked in.

Let's Talk

We're raising \$1M to launch the Arc-native DeFi layer
