

Prepared for Hivemind Capital Partners

We're excited to present Arc Treasury — a project that aligns with your thesis-driven approach to **Payment Rails** and **Infrastructure** investments. Built on Circle's institutional-grade L1, we're bridging TradFi yield to the protocol economy.

Arc Treasury

The first yield vault natively built on Circle's Arc L1

USDC yield from T-Bills. Built on Circle's L1. Live on testnet.

Arc Treasury

The first yield vault natively built on Circle's Arc L1

USDC yield from T-Bills. Built on Circle's L1. Live on testnet.

The Problem

\$270B in stablecoins earning 0% yield

Billions idle. Users want safety + returns — but have no bridge between DeFi & T-Bills.

DeFi risks

Variable rates + high risks

TradFi

Slow, limited access, no crypto rails

USDC Hold

Zero yield on idle capital
