

Arc Treasury - Investor Call Preparation

Meeting with Kayla Phillips (Hivemind Capital)

Date: Monday, December 8, 2025 | 7:00 AM PST (18:00 MSK)

1. INTRODUCTION SCRIPT (2-3 minutes)

Opening

"Hi Kayla, thanks for taking the time to meet with us. I'm Anton, founder of Arc Treasury. I'll give you a quick overview of what we're building and then happy to dive into any questions."

The Problem

"Right now, there's over \$270 billion sitting in stablecoins, mostly earning zero yield. Users have two bad options: either keep USDC idle, or put it into DeFi lending protocols with smart contract risk and variable rates that can drop to near-zero."

Our Solution

"Arc Treasury solves this by offering **real, stable yield from US Treasury Bills** - currently around 4% APY - through a simple deposit interface. We're building on Circle's new Arc blockchain, which gives us native USDC integration and early ecosystem positioning."

How It Works

"The flow is simple:

1. User deposits USDC into our vault
2. We convert it to USYC through Hashnote's Teller contract
3. USYC is backed by US Treasury reverse repo - the safest yield source
4. User earns ~4% APY with one click

On top of this, we've built a cross-chain bridge using Circle's CCTP protocol, and an AMM for USDC/EURC swaps. All live on testnet today."

Why Arc?

"Arc is Circle's own Layer 1 blockchain. Building here means:

- Native USDC, not bridged tokens
- Direct relationship with the largest stablecoin issuer
- First mover advantage in a new ecosystem
- Alignment with Circle's institutional focus"

Current Status

"Unlike most projects at seed stage, we don't have a whitepaper — we have a **working product**. Everything I just described is live on Arc Testnet today:

- Treasury vault earning real USYC yield
- Locked positions with 1/3/12 month terms
- CCTP V2 bridge working between Ethereum and Arc
- Stablecoin swap AMM
- Points system, NFT badges, leaderboards — all functional
- 11 smart contract versions, 50+ deployments

You can try it right now at arctreasury.biz. This isn't a pitch deck project — this is a full-stack DeFi product ready for mainnet."

2. TEAM

Anton - Founder & Lead Developer

- Full-stack blockchain developer
- Built Arc Treasury from zero to working testnet product
- Solidity smart contracts (11 versions, 50+ deployments)
- React/TypeScript frontend
- Infrastructure: Supabase, Vercel, Ponder indexer
- Previous experience: [добавь свой опыт]

[Co-founder Name] - Co-founder & Operations

- Project Manager with experience across multiple tech projects
- Managed teams of 5-15 people
- Experience in startup operations and scaling
- Background in [финтех/крипто/tech - уточни]
- Responsible for: business development, partnerships, investor relations

Advisors (Planned)

- Seeking advisors with Circle/USDC ecosystem connections
 - Legal advisor for token structure
-

3. LEGAL STRUCTURE

Jurisdiction: Georgia (Country)

Why Georgia:

- Crypto-friendly regulatory environment
- 0% corporate tax on foreign income (until distributed)
- Simple company registration process (1-2 weeks)
- Growing Web3 hub with clear legal framework
- EU-aligned regulations without EU bureaucracy
- Low operational costs

Entity Structure

- **Main Entity:** Georgian LLC (შპს) - Arc Treasury LLC
- **Purpose:** Protocol development, operations, IP holding
- **Token Issuer:** Separate foundation (BVI/Cayman) for token launch - TBD

Georgian Tax Structure (Very Favorable!)

Tax Type	Rate	Notes
Corporate Tax	0% on retained earnings	"Estonian model" - pay only when distribute
Corporate Tax (on distribution)	15%	Only when dividends paid out
Virtual Zone Person (VZP)	0%	IT companies, foreign income exempt
Dividend Tax	5%	When distributed to founders
VAT	18%	But crypto services often exempt
Personal Income Tax	20%	For salaries
Social Contributions	~2%	Employer portion

Почему это выгодно:

- 1. **0% на нераспределённую прибыль** - пока деньги в компании, налог не платим
- 2. **VZP статус** - IT компании с иностранным доходом = 0% налог
- 3. **Нет налога на скупто** - Грузия не облагает крипто-активы
- 4. **Низкие зарплатные налоги** - ~20% total vs 40-50% в EU

Пример налоговой нагрузки:

Сценарий	US/EU	Georgia
\$100K revenue, реинвестируем	~\$25-30K налогов	\$0
\$100K revenue, выплачиваем дивиденды	~\$35-40K	~\$19K (15%+5%)
Зарплата \$5K/мес на сотрудника	~\$2-2.5K налогов	~\$1.1K налогов

Legal Costs

Item	Cost
Georgian LLC registration	\$2,000 - \$3,000
VZP status application	\$500 - \$1,000
Legal setup & documentation	\$10,000 - \$15,000
Ongoing compliance (yearly)	\$5,000 - \$10,000
Accounting (yearly)	\$3,000 - \$5,000
Token legal structure (future)	\$30,000 - \$50,000

Timeline

- Q1 2026: Register Georgian LLC (after seed close)
- Q1-Q2 2026: Operational setup, bank accounts, VZP status
- Q4 2026: Begin token legal structure preparation

4. BUSINESS MODEL & REVENUE

Revenue Streams

Stream	Fee	Example (at \$10M TVL)
Yield Platform Fee	5% of yield	$\$10M \times 4\% \times 5\% = \textbf{\$20K/year}$
Bridge Fees	0.06% per transfer	$\$240M \text{ volume} \times 0.06\% = \textbf{\$144K/year}$
Swap Fees	0.2% per swap	$\$50M \text{ volume} \times 0.2\% = \textbf{\$100K/year}$
Total		~\$264K/year at \$10M TVL

Revenue Projections

TVL	Annual Revenue
\$10M	\$250-300K
\$50M	\$1.2-1.5M

\$100M	\$2.5-3M
--------	----------

5. INVESTMENT ASK

Round Details

Parameter	Value
Round	Seed
Target Raise	\$1,000,000 (ideal)
Minimum Raise	\$600K (tight budget)
Minimum Check	\$50K
Token Allocation	15-20%
Valuation (FDV)	\$5M - \$6M
Instrument	SAFT (Simple Agreement for Future Tokens)
Vesting	6-month cliff, 18-month linear unlock

Why \$1M?

\$400K = Survival Mode (NOT RECOMMENDED)

- No USYC integration (\$100K cost)
- Minimal audit (risk)
- 6-9 months runway only
- No marketing budget
- High chance of needing bridge round

\$600K = Minimum Viable

- Basic audit ✓
- USYC integration ✓
- 12 months runway
- Limited marketing
- Tight, no room for errors

\$1M = Proper Launch (RECOMMENDED)

- Full security audit + bug bounty ✓
- USYC institutional integration ✓
- 18+ months runway ✓
- Real marketing campaign ✓
- Conference presence ✓
- Contingency buffer ✓
- Can reach Series A metrics without another raise

6. USE OF FUNDS (Detailed Breakdown)

Option A: \$400K Raise (NOT RECOMMENDED - Survival Mode)

 **Warning:** This budget forces hard tradeoffs - likely NO USYC integration

Category	Amount	%	Details
Security Audit	\$80,000	20%	Basic audit only (1 auditor, no bug bounty)
USYC Integration	\$0	0%	✗ SKIPPED - use simulated yield
Team Salaries	\$180,000	45%	18 months runway (2 founders @ \$5K/mo)
Legal & Entity	\$30,000	7.5%	Georgian LLC only, no token structure
Marketing	\$20,000	5%	Organic only, no paid campaigns
Operations & Travel	\$40,000	10%	1-2 conferences max
Contingency	\$50,000	12.5%	Very tight buffer
Total	\$400,000	100%	

Problems with \$400K:

- No real USYC yield = weaker product differentiation
- Single audit = higher security risk
- No marketing = slow user acquisition
- Will need bridge round in 12-18 months

Option B: \$600K Raise (Minimum Viable)

Category	Amount	%	Details
Security Audit	\$100,000	17%	Basic audit (1 auditor)
USYC Integration	\$100,000	17%	Hashnote institutional setup
Team Salaries	\$150,000	25%	12-15 months runway (2 founders)
Legal & Entity	\$50,000	8%	LLC + basic token structure
Marketing	\$60,000	10%	Limited launch campaign
Operations & Travel	\$40,000	7%	Essential conferences only
Contingency	\$100,000	16%	Buffer (will likely be used)
Total	\$600,000	100%	

Option C: \$1,000,000 Raise (RECOMMENDED)

Category	Amount	%	Details
Security Audit	\$150,000	15%	Multiple audits (Certik + OpenZeppelin) + bug bounty
USYC Integration	\$100,000	10%	Full Hashnote institutional tier
Team Salaries	\$250,000	25%	2 founders + director + accountant + 2 devs (see breakdown)
Legal & Entity	\$80,000	8%	Georgian LLC + full token legal structure
Marketing	\$150,000	15%	Full campaign: KOLs, ads, PR, events
Operations & Travel	\$120,000	12%	Office, all major conferences, investor trips
Contingency	\$150,000	15%	Proper buffer for unexpected costs

Total	\$1,000,000	100%	
-------	-------------	------	--

Why \$1M is the Right Number

Metric	\$600K	\$1M
Runway	12-15 months	18-24 months
Audit quality	1 auditor	2 auditors + bug bounty
Marketing	Basic	Full campaign
Conferences	2-3 events	All major events
Team	2 founders only	2 founders + director + accountant + 2 devs
Operations	Minimal	Proper office, director, accounting
Risk buffer	Minimal	Comfortable
Path to Series A	Need bridge round	Direct path

Operations & Travel Breakdown (Detailed)

Office & Co-working (\$12,000 - \$18,000/year)

Item	Monthly	Annual
Co-working space (Tbilisi/Dubai)	\$500-800	\$6,000-9,600
Equipment (laptops, monitors)	one-time	\$3,000-5,000
Software subscriptions	\$200	\$2,400

Conferences & Events (\$20,000 - \$30,000/year)

Event	Cost	Purpose
Token2049 Dubai (Apr)	\$5,000-8,000	Tickets, travel, hotel, booth
Token2049 Singapore (Sep)	\$6,000-10,000	Major crypto conference
ETH Denver / ETH CC	\$4,000-6,000	Ethereum community
Circle/USDC events	\$2,000-4,000	Ecosystem networking
Smaller events (3-4/year)	\$4,000-6,000	Regional conferences

Travel Budget (\$15,000 - \$25,000/year)

Trip Type	Est. Cost	Frequency
Investor meetings (US/EU)	\$2,500-3,500	3-4 trips/year
Partner meetings	\$1,500-2,000	4-5 trips/year
Team meetups	\$1,000-1,500	2-3 times/year
Conference travel	included above	-

Infrastructure (\$5,000 - \$8,000/year)

Service	Monthly	Annual
Vercel Pro	\$20	\$240
Supabase Pro	\$25	\$300
Railway (indexer)	\$50	\$600
RPC nodes (Alchemy/Infura)	\$100-200	\$1,200-2,400
Domains, DNS, SSL	-	\$500
Monitoring (Sentry, etc.)	\$50	\$600
Email (Resend, Google)	\$50	\$600
Misc tools	\$100	\$1,200

Salary Breakdown (Monthly)

\$600K Scenario (2 founders):

Role	Monthly	Annual
Founder/Developer	\$5,000	\$60,000
Co-founder/PM	\$5,000	\$60,000
Total Team	\$10,000	\$120,000

\$1M Scenario (2 founders + key hires throughout Year 1):

Role	Monthly	Start Month	Y1 Cost
Founder/Developer	\$6,000	Month 1	\$72,000
Co-founder/PM	\$6,000	Month 1	\$72,000
Operations Director	\$3,500	Month 2	\$38,500 (11 mo)
Accountant (part-time)	\$800	Month 2	\$8,800 (11 mo)
Senior Developer	\$5,000	Month 4	\$45,000 (9 mo)
Junior Developer	\$2,500	Month 7	\$15,000 (6 mo)
Total Year 1	-	-	\$251,300

Note: Below-market salaries - founders taking risk with equity upside. Market rate for these roles would be \$10-15K/month. Directors/accountants in Georgia are significantly cheaper than US/EU rates.

Team Expansion Plan (\$1M scenario)

Timeline	Hire	Monthly Cost	Purpose
Month 1-3	Operations Director	\$3,000-4,000	Business development, partnerships, legal coordination
Month 1-3	Accountant (part-time)	\$500-1,000	Bookkeeping, tax compliance, financial reporting

Month 3-6	Senior Solidity Developer	\$5,000	Smart contract development, audit prep
Month 6-9	Junior Developer (assistant)	\$2,000-3,000	Frontend support, testing, documentation
Month 9-12	Community Manager (part-time)	\$1,500-2,000	Discord, Twitter, user support
Post-Series A	Full team expansion	TBD	Marketing, BD, additional devs

Detailed Team Structure (by end of Year 1)

Role	Type	Monthly	Annual	Location
Founder/Lead Developer	Full-time	\$6,000	\$72,000	Remote/Georgia
Co-founder/PM	Full-time	\$6,000	\$72,000	Remote/Georgia
Operations Director	Full-time	\$3,500	\$42,000	Georgia (local)
Accountant	Part-time	\$800	\$9,600	Georgia (local)
Senior Developer	Full-time	\$5,000	\$60,000	Remote
Junior Developer	Full-time	\$2,500	\$30,000	Remote
Community Manager	Part-time	\$1,500	\$18,000	Remote
Total Team (end Y1)	7 people	\$25,300	\$303,600	

Note: Hiring is gradual throughout the year, actual Year 1 cost ~\$200-220K

7. MARKETING STRATEGY

✓ Phase 1: Pre-Launch (COMPLETED - 2025)

- Twitter/X presence: @arctreasury active
- Discord community: setup complete
- Content: threads, explainers posted
- Crypto media outreach: ongoing

✓ Phase 2: Testnet Campaign (COMPLETED - 2025)

- Testnet incentive program: points system LIVE
- Ambassador program: initial KOLs engaged
- NFT badges: fully implemented
- Referral system: working on testnet
- 1,700+ investor emails sent

Phase 3: Pre-Mainnet Marketing (Q1-Q2 2026) - \$50K

- Expand testnet user base through points
- Galxe/Zealy quests campaigns
- YouTube tutorials & crypto podcasts
- Build waitlist for mainnet launch
- Continue investor outreach

Phase 4: Mainnet Launch (Q3 2026) - \$50K

- Launch announcement campaign
- Paid crypto media (Coindesk, Cointelegraph)

- Twitter ads targeting DeFi users
- Influencer partnerships (tier 2-3 KOLs)
- AMA sessions with crypto communities

Phase 5: Growth (Q4 2026 - 2027) - \$50K+

- Referral program at scale (10% bonus)
- Yield comparison campaigns
- Partnership co-marketing
- Conference presence (Token2049, ETH events)

Key Marketing Metrics

Metric	Current (Dec 2025)	Target (Q4 2026)	Target (Q4 2027)
Twitter followers	500+	10,000+	25,000+
Discord members	200+	5,000+	15,000+
Testnet wallets	100+	3,000+	-
Mainnet wallets	-	2,000+	10,000+
TVL	Testnet	\$5-15M	\$75-100M

8. ROADMAP 2026-2027 (Realistic Timeline)

Current Status (December 2025) — FULLY WORKING TESTNET PRODUCT

✅ **Product (100% functional on testnet):**

- **Treasury Vault** — deposit USDC, earn T-Bill yield (~4% APY)
- **Real USYC Integration** — connected to Hashnote's Teller contract
- **Locked Positions** — 1/3/12 month terms with bonus yield
- **CCTP V2 Bridge** — cross-chain Sepolia ↔ Arc, real Circle protocol
- **Stablecoin Swap AMM** — USDC/EURC with liquidity pool
- **Points System** — earn points on every action
- **NFT Badges** — 5 achievement badges, fully minted
- **Referral Program** — 10% lifetime bonus, working
- **Leaderboard** — real-time ranking

✅ **Technical:**

- 11 smart contract versions deployed & tested
- 50+ contract deployments on testnet
- React/TypeScript frontend (Vercel)
- Supabase backend + Ponder indexer
- Full mobile-responsive design

✅ **Traction:**

- 1,700+ investor emails sent
- Points program active
- Ready for mainnet deployment

🔄 **In progress:**

- Seed fundraising (this call with Hivemind)
- Georgian LLC registration preparation

2026 Roadmap - Launch & Growth Year

Quarter	Milestone	Details
Q1 2026	Seed Round Close	Close \$600K-1M seed round
Q1 2026	Legal Setup	Register Georgian LLC, VZP status, bank accounts
Q1 2026	Team Expansion	Hire Senior Solidity Developer
Q2 2026	Security Audit	Begin audit with Certik/OpenZeppelin
Q2 2026	USYC Institutional	Complete Hashnote institutional tier onboarding
Q2 2026	Arc Mainnet Prep	Testing when Circle launches Arc mainnet
Q3 2026	Audit Complete	Publish audit report, launch bug bounty
Q3 2026	MAINNET LAUNCH	Deploy to Arc mainnet, begin user onboarding
Q3 2026	Early TVL	Target \$1-5M TVL
Q4 2026	Growth Push	Marketing campaign, KOLs, community
Q4 2026	TVL Target	Target \$5-15M TVL
Q4 2026	Token Legal	Begin token legal structure (BVI/Cayman)

2027 Roadmap - Scale & Token Year

Quarter	Milestone	Details
Q1 2027	TVL Growth	Target \$15-30M TVL
Q1 2027	Second Audit	Additional security audit for new features
Q1 2027	Multi-chain	Expand to Base, Arbitrum
Q2 2027	Token Prep	Tokenomics finalization, exchange discussions
Q2 2027	Institutional	B2B yield-as-a-service for crypto treasuries
Q2 2027	TVL Target	\$30-50M TVL
Q3 2027	Community	Ambassador program at scale, governance prep
Q3 2027	TVL Target	\$50-75M TVL
Q4 2027	TOKEN LAUNCH (TGE)	Airdrop to points holders + public sale/listing
Q4 2027	DAO Governance	Launch governance with token holders
Q4 2027	TVL Target	\$75-100M TVL

2028 Preview - Expansion Year

Quarter	Milestone	Details
Q1 2028	Series A	If metrics support, raise Series A (\$5-10M)
2028	Multi-currency	EUR, GBP, other stablecoin vaults
2028	Global Expansion	Additional jurisdictions, more yield sources

2028	TVL Target	\$150M+ TVL
------	------------	-------------

Detailed Timeline Visual

2026:
Q1: Seed Close + Legal
Q2: Audit + USYC Integration
Q3: MAINNET LAUNCH
Q4: Growth + Marketing → \$5-15M TVL
2027:
Q1: Multi-chain + Scale
Q2: Token Legal + Institutional
Q3: Community + Governance Prep
Q4: TOKEN LAUNCH (TGE) → \$75-100M TVL
2028:
Series A → Global Expansion → \$150M+ TVL

Key Milestones Summary

Milestone	Target Date	Success Metric
Seed Round Close	Q1 2026	\$600K-1M raised
Georgian LLC	Q1 2026	Entity operational
Security Audit	Q3 2026	Audit report published
Arc Mainnet Launch	Q3 2026	Live on mainnet
\$10M TVL	Q4 2026	Product-market fit
Multi-chain	Q1 2027	Base + Arbitrum live
\$50M TVL	Q2 2027	Strong traction
Token Launch	Q4 2027	TGE + exchange listing
\$100M TVL	Q4 2027	Series A ready
Series A	Q1 2028	\$5-10M raise

⚠️ Timeline Dependency: Arc Mainnet Launch

Important: Our mainnet launch depends on Circle's Arc mainnet release schedule.

Arc Mainnet Scenario	Our Mainnet	Token Launch
Arc launches Q1-Q2 2026	Q2-Q3 2026	Q3-Q4 2027
Arc launches Q3-Q4 2026	Q4 2026 - Q1 2027	Q4 2027 - Q1 2028
Arc delays to 2027	Q1-Q2 2027	Q1-Q2 2028

What we do while waiting for Arc mainnet:

- Complete security audit on testnet

- Build TVL on testnet through points program
- Expand to other chains (Base, Arbitrum) as backup
- Build community and marketing presence
- Develop B2B partnerships

This is actually a BENEFIT for investors:

- We're building on Circle's strategic L1 = strong ecosystem backing
- If Arc delays, we have multi-chain fallback plan
- Timeline flexibility is normal for early-stage crypto projects

Why This Timeline?

Conservative approach:

1. **~24 months to token** (Q1 2026 → Q4 2027) - builds real product, users, TVL first
2. **Multiple audits** - security is paramount for DeFi
3. **Organic growth** - not rushing for vanity metrics
4. **Regulatory safe** - proper legal structure before token
5. **Proven metrics** - Series A based on real traction, not hype
6. **Flexible to Arc timeline** - we adapt to Circle's mainnet schedule

What we're NOT doing:

- **✗** Rushing token launch for quick liquidity
- **✗** Promising unrealistic TVL numbers
- **✗** Skipping security audits
- **✗** Launching without proper legal structure
- **✗** Being dependent on single chain (multi-chain backup plan)

Key 2027 Goals (End of Year)

1. **\$75-100M TVL** - flagship metric for DeFi protocols
2. **Token Launch** - TGE with proper distribution
3. **Revenue \$1-2M** - path to sustainability
4. **Multi-chain** - Arc + Base + Arbitrum
5. **5,000+ active users** - real community
6. **Series A ready** - metrics to support next raise

9. COMPETITIVE LANDSCAPE

Direct Competitors

Protocol	TVL	Yield	Chain	Our Advantage
Ondo Finance	\$600M+	4-5%	Ethereum	We're on Arc (Circle's chain), lower fees
Mountain Protocol	\$50M+	4%	Multi	Native CCTP bridge integration
Backed Finance	\$30M+	4%	Ethereum	Simpler UX, points incentives
OpenEden	\$100M+	4-5%	Multi	First mover on Arc ecosystem

Indirect Competitors

Protocol	Type	Our Advantage
Aave/Compound	Lending	Stable yield vs variable, lower risk

Yearn	Yield aggregator	T-Bill backing vs DeFi strategies
Maker DSR	Savings rate	Higher yield, simpler UX

Our Moat

1. **Arc Ecosystem** - first T-Bill vault on Circle's L1
2. **Native CCTP** - integrated bridge, not just vault
3. **Full Stack** - vault + bridge + swap + points
4. **Circle Alignment** - building on their chain shows commitment

10. RISKS & MITIGATIONS

Risk	Likelihood	Mitigation
Smart contract hack	Medium	Multiple audits, bug bounty, insurance
USYC integration issues	Low	Hashnote is established, SEC-registered
Arc network fails	Low	Circle backing, can migrate contracts
Regulatory changes	Medium	Georgia jurisdiction, legal counsel
Competition	High	First mover, ecosystem relationships
Low TVL adoption	Medium	Points incentives, marketing, partnerships

11. QUESTIONS FOR KAYLA

About Hivemind

1. What's Hivemind's typical check size for seed rounds?
2. Do you lead rounds or prefer to co-invest?
3. What's your investment timeline from first call to term sheet?
4. What portfolio companies do you have in DeFi/yield space?

About Our Project

5. What would you need to see to move forward?
6. What concerns do you have about Arc Treasury?
7. Do you have relationships at Circle we could leverage?
8. What metrics do you prioritize for DeFi investments?

Strategic

9. How do you see the RWA/T-Bill yield space evolving?
10. What's your view on the Arc ecosystem opportunity?

12. POTENTIAL OBJECTIONS & RESPONSES

"The team is small"

"Two people built a complete DeFi product — treasury vault, bridge, swap, points system, NFT badges — all working on testnet. That's not small team problems, that's exceptional execution. With funding, we'll expand strategically: director, accountant, 2 more developers. Many successful DeFi protocols started with 2-3 person teams (Uniswap, Compound early days)."

"Arc is unproven"

"That's exactly the opportunity. Arc is Circle's strategic bet - they're not going to abandon their own L1. Being early means first mover advantage and potential Circle ecosystem support. Low competition now vs. Ethereum where it's saturated."

"No audit yet"

"Correct - that's our #1 use of funds. We're not launching mainnet without a proper audit. We've been conservative and transparent about this."

"\$5-6M FDV seems high for seed"

"It's actually conservative for DeFi seed rounds. Ondo raised at \$20M+, Mountain at higher valuations. We're pricing for early believers who want meaningful upside. At \$100M TVL and \$2M revenue, \$5-6M seed valuation gives 20-40x potential."

"What if yield rates drop?"

"T-Bill yields are set by the Fed. Even if rates drop to 2%, that's still better than 0% on idle USDC. And we have multiple revenue streams - bridge and swap fees don't depend on yield rates."

"Why Georgia?"

"Crypto-friendly, tax-efficient, fast setup, low costs. It's becoming a Web3 hub. We're not trying to hide - we want a legitimate, compliant structure. Georgia offers that without excessive bureaucracy."

13. FOLLOW-UP MATERIALS

After the call, send:

1. **This deck** as PDF (sanitized version)
2. **Testnet link:** <https://arctreasury.biz>
3. **Demo video** (if requested)
4. **Smart contract repo** (if technical due diligence)
5. **SAFT template** (if moving to terms)

14. CALL STRUCTURE (30 minutes)

Time	Section	Duration
0:00	Intro & pleasantries	2 min
0:02	Project overview	5 min
0:07	Demo (screen share)	5 min
0:12	Team & roadmap	3 min
0:15	Business model & ask	5 min
0:20	Q&A from Kayla	8 min
0:28	Our questions & next steps	2 min

15. KEY TALKING POINTS (Memorize These)

1. **"Real yield, real T-Bills"** - not DeFi ponzinomics
2. **"Circle's own blockchain"** - strategic positioning
3. **"Working product TODAY"** - fully functional on testnet, not just an idea
4. **"Conservative valuation"** - \$5-6M FDV with 20-40x upside potential

5. **"Audit is priority #1"** - we take security seriously
 6. **"Georgia = legitimate & efficient"** - not offshore hiding
 7. **"Full stack DeFi"** - vault + bridge + swap + points - all working NOW
-
